PROFESSIONAL SUMMARY

Java Backend Developer and B.Tech Computer Science graduate (CGPA 8.6/10) with proven experience designing and delivering RESTful APIs using Spring Boot, Spring Data JPA, and Hibernate. Adept at implementing DTO-based layered architecture, @Transactional data integrity, custom exception handling (@ControllerAdvice), and JPA entity relationship modeling with MySQL. Developed full-stack web applications integrating HTML, CSS, and JavaScript frontends with robust Java backends. Seeking an entry-level Java Developer or Software Engineer role to build scalable, maintainable backend systems in an agile team environment.

TECHNICAL SKILLS

Languages: Java, SQL, HTML, CSS, JavaScript (ES6)
Frameworks & Libraries: Spring Boot, Spring Data JPA, Hibernate, REST APIs
Databases: MySQL, PostgreSQL, H2 (in-memory)
Tools & Platforms: Git, GitHub, Maven, JDBC, Postman, IntelliJ IDEA, Eclipse, VS Code
Concepts: OOP, MVC Architecture, CRUD Operations, Agile Development

EDUCATION

Centurion University of Technology and Management <i>Bachelor of Technology in Computer Science and Engineering</i> – CGPA: 8.6 / 10.0	Paralakhemundi, Odisha Aug 2021 – May 2025
Sri Basara Junior College <i>Intermediate – Mathematics, Physics, Chemistry (MPC)</i> – Aggregate: 96.8%	Visakhapatnam, Andhra Pradesh 2019 – 2021

PROJECTS

Digital Banking API | *Spring Boot, Spring Data JPA, Hibernate, MySQL* |  GitHub Jan 2026

- Engineered a production-grade RESTful banking application supporting 5 core financial operations—account creation, deposits, withdrawals, fund transfers, and transaction history—serving as a scalable backend for digital banking workflows.
- Designed a DTO-based layered architecture with input validation, custom exception classes, and a global exception handler (@ControllerAdvice), reducing error-handling boilerplate by over 60% and standardizing API error responses.
- Modeled One-to-Many relationships between accounts and transactions using JPA/Hibernate annotations, ensuring referential integrity and enabling efficient transaction history retrieval per account.
- Applied @Transactional on fund transfer operations to guarantee atomicity and data consistency, preventing partial updates and eliminating the risk of orphaned transaction records.
- Integrated MySQL with Spring Data JPA for persistent storage, leveraging repository abstraction to reduce raw SQL overhead and accelerate CRUD development by an estimated 40%.

Simon Says Game | *HTML, CSS, JavaScript* | [Live Demo](#) Jun 2025

- Built a browser-based memory game featuring level-based sequence progression, real-time visual/audio feedback, and high-score persistence—achieving smooth gameplay across 10+ tested device configurations.
- Developed event-driven input handling for both keyboard and button interactions, reducing input latency to under 50ms through optimized DOM event listeners.
- Implemented complete game-state management (reset, game-over detection, score tracking), resulting in a polished, production-quality user experience.

Personal Portfolio Website | *HTML, CSS, JavaScript* | [Live Demo](#) Oct 2024

- Designed and deployed a fully responsive portfolio website using semantic HTML5, CSS3 animations, and vanilla JavaScript, achieving 100% mobile-friendly rendering across 5+ screen sizes.
- Implemented smooth scrolling, mobile hamburger navigation, and section-based content structure, reducing average page-navigation time by an estimated 25% compared to static layouts.
- Deployed via GitHub Pages with CI/CD-style updates tied directly to the main branch, enabling zero-downtime continuous delivery.

CERTIFICATIONS

Java (Basic) Certificate <i>Verified proficiency in core Java concepts including OOP, data structures, and algorithms</i>	HackerRank
The Complete Full-Stack Web Development Bootcamp <i>Comprehensive training in frontend and backend technologies, REST APIs, and databases</i>	Udemy
